

Mobile Phone and WI FI Radiation Harmonizers

Mobile Phone and WI FI Radiation Harmonizers are designed to neutralize the noxious radiation emissions from all types of mobile phones and WI FI systems. Mobile phones and WI FI systems send a noxious energy beam direct from the phone or lap top to the communication tower or modems.

The same noxious energy beam is present between wireless modem and lap top computer.

This noxious energy beam penetrates the cells around your head while using the phone, and of people who may be positioned between the communicating phone or lap top and the tower or modem thus affecting their wellbeing. Hot head syndrome experienced while talking on a mobile phone for a prolonged period of time is also reduced.

The dangerous radiation emitted from the phone while in your pocket or hand bag, that penetrates the cells of your body with Positive Ions is also harmonized.

The Harmonizer creates a healthy Negative Ion life force energy field which transmutes all noxious Positive Ion energy fields around the lap top or phone and also the beam connection at the same time.

How do I know that the Harmonizer is protecting me?

Here is a simple test.

Without the Harmonizer attached to the phone, hold the phone to feel how the Positive Ion field can make you feel sick in the stomach, or a dizziness in the head.

Then while making a call hold the phone at arms length and then turn around until you can feel the noxious energy beam penetrating you with symptoms as described above.

Then attach the Harmonizer to the phone and do the same trial again.

You will feel that the phone and that the noxious energy beam no longer makes you feel sick or dizzy.

What the Harmonizer has been able to achieve is converting the noxious Positive Ion field to a balanced for better well being, Negative Ion Field.

In fact you may not be able to feel anything at all. This proves the effectiveness of the Harmonizer.

Other medical tests performed by your health practitioner measuring before and after pulse rates, muscle testing and with the use of Bio Feedback technology commonly used by Naturopaths will demonstrate that the application of the Phone Harmonizer successfully negates the dangerous effect of the radiation from a mobile phone.

Another scientific method of validating the effectiveness of the Harmonizer is the Earth Magnetic Grid Harmonizing test. On which the Harmonizer achieves a rating 35 metres. **No other Mobile Phone neutralizer on the market can achieve such impressive results.**

Available in wafer style to fit neatly under the battery cover, so that it can easily be transferred from one phone to another as you upgrade your phone technology, or adhesive backed for placement on wireless equipment such as WI FI routers, baby monitors, GPS units etc.

Mobile Phone Harmonizer \$25.00
